

RODRIGO RETANA LÓPEZ

Junior Software Developer | Java & Spring Boot | Angular

(506) 6088-9539 | rretanalopez@gmail.com | San José, Costa Rica

[Portfolio](#) | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Software Engineering student at Universidad Cenfotec (expected 2027) with hands-on academic project experience building full-stack applications in Java, Spring Boot, and Angular — including a collaborative team project TribuTico made with Java – Spring boot back-end and Angular front end, and the corporate web application for Chupis Ortopédica. Brings this technical foundation together with over two years of experience inside multinational corporate environments (TransUnion, Equifax, United Collection Bureau), working daily with CRM platforms, relational databases, and strict data-security and compliance protocols. Comfortable with Git-based version control, Agile/Scrum teamwork, and REST API concepts. Bilingual Spanish-English (B2+), fast learner, and motivated to grow into a full-time software engineering role.

RELEVANT TECHNICAL PROJECTS

Chupis Ortopédica website | -Angular, Typescript, Java, Spring boot (enterprise project, 4 months)

- Built the company's public-facing website in Angular, including a product catalog module for adding and displaying products; back-end built with Spring boot, hosted on Railway.

<https://chupis-ortopedica.vercel.app/>

TribuTico | Java, Spring Boot, Angular, TypeScript

- Collaborated within a team to build a full-stack web application: backend services and REST endpoints with Spring Boot, and a front-end interface with Angular/TypeScript, following Agile team practices.

<https://github.com/CodingLab-TribuTico>

Personal Developer Portfolio | Angular

- Built and deployed a personal portfolio site to showcase development projects.

<https://rodrigoretana.github.io/Rodrigo-Portafolio/>

Intermittent Fasting Tracker | JavaScript, Node.js, MongoDB

- Developed a full-stack tracking application with a Node.js/MongoDB backend and a JavaScript front end.

TECHNICAL SKILLS

- Languages: Java, C#, JavaScript, TypeScript
- Frameworks & Web: Spring Boot, .NET, Angular, REST APIs, HTML, CSS
- Databases: MySQL, SQL Server,
- Cloud: Microsoft Azure fundamentals (coursework / self-study)
- Practices & Tools: Git, Agile/Scrum, first-level troubleshooting and incident resolution
- Languages spoken: Spanish (native), English (B2+)

PROFESSIONAL EXPERIENCE

Auxis — Jr. Appeals Collector *Feb 2026 – Present*

- Handled calls with U.S. health insurance companies to verify and follow up on appeal statuses, logging each case in a proprietary CRM system.
- Maintained records in internal systems, ensuring traceability, accuracy, and confidentiality of sensitive information under regulated data-handling protocols.

TransUnion — Bilingual Voice Agent

Nov 2024 – Feb 2026

- Provided user support for enterprise systems managing consumer credit data, resolving first-level inquiries and incidents.
- Applied strict data security, compliance, and access-control procedures; used internal platforms and database-driven systems to log and track cases.
- Documented incidents, workflows, and operational procedures, contributing to service continuity.

Equifax — Global Customer Care

Jun 2024 – Oct 2024

- Provided first-level technical support to end users, troubleshooting and escalating system-related issues — direct, hands-on familiarity with Equifax's internal tools, workflows, and quality/compliance standards.
- Used internal dashboards for case tracking and reporting, ensuring compliance with data protection and quality standards.

United Collection Bureau — Back Office

Apr 2021 – Jun 2024

- Managed back-office processes involving structured data and internal systems, maintaining accuracy and integrity of sensitive information; developed analytical and process-oriented skills applicable to troubleshooting.

EDUCATION

Bachelor's Degree in Software Engineering — In progress (2022 – 2027)

Universidad Cenfotec

High School Diploma (2016 – 2020)

Liceo María Auxiliadora de San José
